If not, we can look at dates later in January. Please provide your availability in this link: (b) (5) Thank you, Lesia Lesia Monson Department of the Interior Office of the Secretary 4230 University Drive, Suite 300 Anchorage, AK 99508 (b) (6) On Dec 20, 2017, at 5:42 PM, Noyles, Christopher wrote: All, Happy Holidays! I think we should arrange a conference call at a time that accommodates all of us. I recognize this is a significant challenge. I've been down this road once before many years ago with very limited results. We did some data review with Steven Amstrup. Weather consideration as those on the email chain can already attest are significant factor. Additionally, the signatures are small and not always well defined. In short, it's a challenge and I look forward to addressing with a new team, sensors and techniques. A polar bear expert I am not so, we will need to understand their den activity and movements a bit. This will help us define expectations and consider additional sensors and new techniques for inquiry. Cheers, Chris Christopher C. Yes the weather has been unusually warm and there is more snow then anyone has seen in years. It took me 18 days to work around weather enough to get in seven flights, but we got 'er done. I am not heading back up. Thanks. Justin Blank Operations Supervisor/Senior Scientist Fairweather Science, LLC. I think PBI may be able to give us some collard bear locations for dens in Svalbard, which should help us prove that out as well. From the screen shot and facebook it looks like the weather wan't helpful this season, are you heading back up? -Steve Steve Wackowski Senior Adviser for Alaskan Affairs Department of the Interior 4230 University Drive, Suite 300 Anchorage, AK 99508 (b) (6)
